Phase 1 Deliverable Format

1. **Project Overview**
    - **Title**: Name of the project
    - **Objective**: Clear statement of the project's primary goal

Problem Understanding

- **Description**: Brief description of the project problem
- **Relevance: Explanation of why this problem is significant**
- **Expected Outcomes**: Preliminary list of outcomes the project aims to achieve

Literature Review

- **Related Work**: Overview of similar projects or solutions
- **Technological Foundation**: Key concepts, tools, and technologies relevant to the project (e.g., blockchain concepts, cryptographic standards)
- **Research Papers and Articles**: Include 2-3 foundational papers or articles for further reading

Project Requirements

- **Functional Requirements**: Define core functions the project must support
- **Non-Functional Requirements**: Performance, usability, and security requirements as applicable
- **Resource Requirements**: List of any specific tools, libraries, or hardware required
- **System Architecture (Initial Draft)**

High-Level Diagram:

- Include a simple block diagram or flowchart.
- **Components**: Brief description of major components, modules, or subsystems

References

- List of citations and URLs for referenced papers, articles, and tools
